Future Electric

It has been announced that the programme of works at Anderton Boat Lift will be prioritised during the year ahead to see the 'Cathedral of the Canals' back open and operational for boaters.

The investment will enable the lift to transfer boats between the Trent & Mersey Canal and the River Weaver once again in 2027. This will remedy the fault with the structure's caisson gates, discovered during routine maintenance earlier this year, and will also provide an overdue update to the lift's operating system required to make the lift's passage of boats more resilient.

A much larger project at the Anderton site that would require additional and presently unaffordable capital expenditure is being paused.
