Future Electric

The IWA has worked with Canal & River Trust (CRT) to help improve its revised Restoration Delivery Plan (RDP), published on 28th July 2026, which will provide the framework for future restoration of canals not currently open to boats and managed by the Trust. Through reinforcing the importance of a friendly approach to waterway restoration and encouraging CRT to consider restoration as a core charitable objective rather than a secondary priority, IWA is pleased that the Trust has listened and that the result is an improved plan.

The Restoration Delivery Plan is intended to set out how the Trust will work with restoration promoters and other partners to deliver the restoration of waterways across England and Wales. As a critical friend to CRT, IWA has engaged constructively with the Trust's senior management to ensure that restoration receives the support and strategic priority it deserves.
